

“ “ DECODING QUOTES ” ”

Directions: Decode the quotes by writing down every other letter; starting with the first letter. When you've come to the end of the code go back to the beginning. Note that connected boxes indicate the codes are a part of the same quote. Put the decoded boxes together correctly and you'll uncover the meaningful quote. You must, however, think quick and write fast if you want to be the first to break the code! See website for coding details and more fun games.

An example on how to decode the quotes.
