

**Directions:** Cut out the pillows and keep them in numerical order. Dim the lights, give everyone a flashlight, instruct them to turn them on and seat them in a circle. Read the first storyline. The 1st person in the circle must recall the 1st item in the storyline, the 2nd person (clockwise) must recall the next item, etc. This will continue around the circle until someone forgets the next item in which case they must turn off their light. Continue around the circle with the storylines. The last person with their light on is the winner! See website for full details.
